

Australian Philanthropic Services Foundation

Investment report for the six months ended 31 December 2018

This investment report for Australian Philanthropic Services Foundation (APS Foundation) covers the six-month period from 1 July 2018 to 31 December 2018. The next report will be for the six-month period from 1 January 2019 to 30 June 2019 which should be available in August 2019. All previous reports are available to sub-fund holders via the online client portal. In the meantime, the assets of APS Foundation continue to be valued at the end of each month, at which time the value of each sub-fund is also updated and available via the online client access portal.

Investment objective and strategy

The APS Foundation's Investment Strategy document (also available to sub-fund holders via the online client access portal) sets the investment objective as aiming to achieve a return after fees at least equal to CPI inflation + 4% per annum, measured over rolling 7-year periods. In arriving at this objective, the Trustee has taken into account the following:

- the need to donate a minimum of 4% per annum to eligible charities;
- the likelihood of inflation affecting the value of the investments and income generated;
- the risk of capital or income loss;
- the liquidity of the investments;
- the costs of investment alternatives and transactions; and
- the benefits of diversification of investments.

The Trustee believes that the best way to achieve the investment objective is to invest a significant portion of the assets in growth-oriented investments (such as shares) with a bias at most times to Australian listed shares because of the additional benefits from franking credits attaching to dividends. The Trustee also believes it would be prudent to have some exposure to income-oriented investments (such as fixed income securities, lowly geared infrastructure/property securities and/or cash), with an increased emphasis on such investments when share market valuations appear stretched or where there appears to be a better risk/return trade-off in the immediate future from holding such securities.

As such, the Trustee has decided that the broad investment ranges for APS Foundation should be as follows:

25% – 75%	Growth-oriented investments (e.g. shares)
25% – 75%	Income-oriented investments (e.g. fixed income securities, lowly geared infrastructure/property securities and/or cash)

The Trustee has up to three months from the date of receiving new money into APS Foundation to adhere to these broad investment ranges. This recognises that new money immediately alters the asset allocation and a prudent amount of time is required to invest new cash. The Trustee notes the APS Foundation receives considerable inflows in the month of June each year.

Fees

APS manages all aspects of the APS Foundation (including administration, compliance, arranging investment management, and facilitating the yearly audit) and charges a single, all-inclusive fee of 1% per annum, excluding GST, on the amount held in each sub-fund. This fee is calculated and paid monthly. APS Foundation can claim back 75% of GST paid and as such the final cost to sub-funds is 1.025% per annum.

Most of the assets of the APS Foundation are managed by external fund managers. To the extent possible, such services are secured on a pro bono basis. However, where a pro bono arrangement cannot be secured with a fund manager, the Trustee may still choose to use them where they believe the particular investment will produce an attractive post fees return for the APS Foundation. Such extra fees charged by the external fund managers are paid by the APS Foundation and are in addition to the 1% fee paid to APS. Based on the assets of the APS Foundation held at 31 December 2018, we estimate such extra fees to be 0.18% per annum.²

¹ The performance of APS Foundation is calculated on a time-weighted basis from monthly valuations. APS Foundation commenced operation as a Public Ancillary Fund on 18 May 2012 and on 11 July 2012 the first investments were made. Before that time APS Foundation held cash on deposit. The 'since inception' date used is 1 July 2012. Figures greater than one year are expressed as annual compound returns.

² This only includes ongoing management fees of unlisted managed investment schemes or individually managed accounts. It excludes performance fees and out of pocket costs of third party managers as well as fees incurred by listed investment companies.
